Researchers Forum | Networking Opportunities in Berlin
Data Driven Innovation and Big Data

TECHNOLOGIE STIFTUNG BERLIN

Tuesday | July 22th, 2014 | 6 p.m.
Technologiestiftung Berlin
Fasanenstraße 85 | 10623 Berlin
5th Floor

In the last few years, Data has become one of the most valuable resources. A lot of Scientific research and economic development are now based on huge amounts of data in the scale of peta- and zetabytes, accumulated by experiments, data collections and us just surfing the web. How do you manage these huge collections and find those pieces that are useful for your work? Where are the starting points for Innovation? What are Berlin's strengths and who are the key players?

If you are a visiting scientist, undergraduate or a student doing your research in the field of Big Data or want to find new approaches to these topics, the Technologiestiftung Berlin cordially invites you to the Researchers Forum – Focus on Big Data. On the 26th of June, you will get the chance to meet and introduce yourself to representatives from different institutions, and fellow visiting scientists from all over the world.

The Researchers Forum ist a series of events held by the Technologiestiftung Berlin.

Agenda

Daten Driven Innovation in Berlin
Nicolas Zimmer
CEO Technologiestiftung Berlin

A Marketplace for Information and Analytics:
Challenges and Opportunities
Dr. Holmer Hemsen
School of Electrical Engineering and Computer Sciences
Database Systems and Information Management Group
Technische Universität Berlin

Feature-Directed Visualization
Prof. Dr. Vijay Natarajan
Konrad Zuse Zentrum für Informationstechnik Berlin
Indian Institute of Science, Bangalore

Get together

We thank the Alexander von Humboldt Foundation for their cooperation.
