Ian Goldin presents

## The Pursuit of Development

**Economic Growth,  
Social Change, and Ideas**

What do we mean by development? How can citizens, governments and the international community foster development?

In his new book, Ian Goldin considers the contributions that education, health, gender, equity and other dimensions of human well-being make to development, and discusses why it is also necessary to take into account the role of institutions and the rule of law as well as sustainability and environmental concerns.
