

Leibniz Institute for
Immunotherapy
Cells built to cure

International LIT Symposium

Synthetic Immunology / Synthetic Biology

June 26th – 27th, 2024
Regensburg, Germany

Speakers

Hinrich Abken
Franziska Blaeschke
Markus Feuerer
Luca Gattinoni
Alena Gros Vidal
John Haanen
Michael Jensen
Markus Jeschek
Carl June
Christopher Klebanoff
Megan Levings
John Maher
Jens Meiler
Cristina Puig Saus
Shimon Sakaguchi
Christian Schmidl
Kilian Schober
Velia Siciliano
Naomi Taylor
Fabian Theis

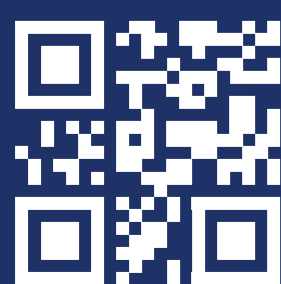

Keynotes

Carl June: Updates with armored CAR T cells

Shimon Sakaguchi: Induction of antigen-specific and functionally stable Tregs from effector/memory T cells for adoptive cell therapy of autoimmune disease

Fabian Theis: Generative AI to model cellular state and response in single cell genomics

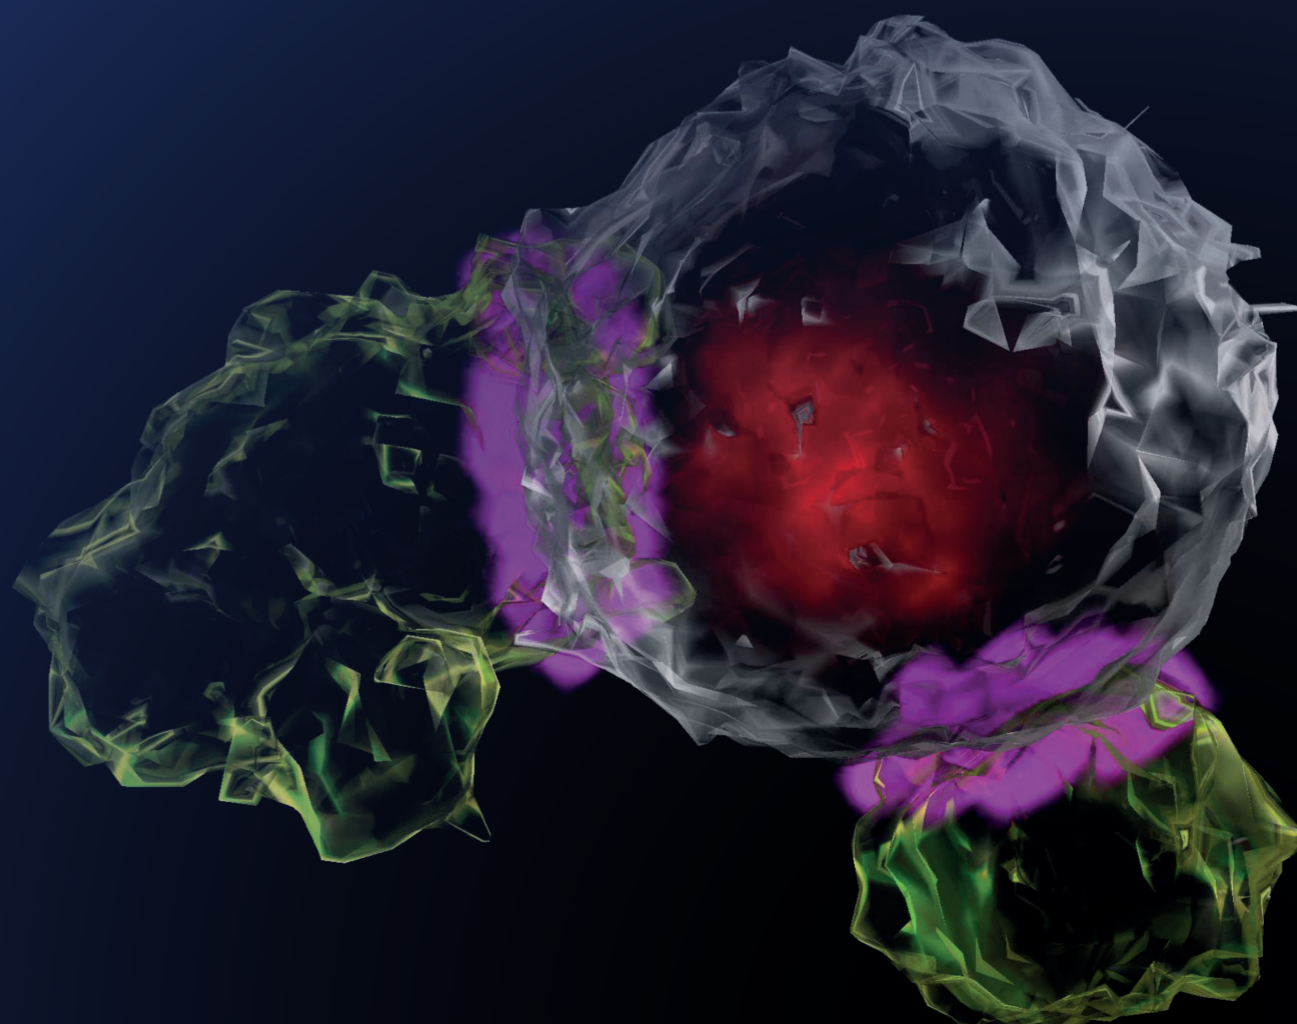

Leibniz Institute for
Immunotherapy
