

Workshop 'Novel Tools for Early Detection of Pancreatic Cancer' 06 - 07 July 2012 at the Hotel Bristol, Bonn, Germany

Preliminary Programme

Friday, 06 July 2012

15.00 Arrivals, Welcome

Session 1: "Introduction"

15.30 - 16.10 1. Precursor lesions and early pancreatic cancer – what should we look for?
Günter Klöppel, Munich

16.10 - 16.50 2. Tumor microenvironment: impact for early lesion progression
Irene Esposito, Munich

16.50 - 17.10 Coffee Break

17.10 - 17.30 3. Familial Pancreatic Cancer Screening and Consequences
Detlef Bartsch, Marburg

17.30 - 18.10 4. What do we learn from pancreatic cancer genome sequencing to help the patient?
Andrew Biankin, Sydney

18.10 - 18.50 5. Cystic Precursor Lesions of Pancreatic Cancer: A paradigm for early detection of pancreatic neoplasma
Anirban Maitra, Baltimore

19.30 Get Together / Dinner

Saturday, 07 July 2012

09.00 Welcome

Session 2: Biomarker

09.10 - 09.50 6. What (will be) are the requirements for a biomarker to detect early pancreatic cancer? What are the risk groups amenable for biomarker screening?
John Neoptolemos, Liverpool

09.50 - 10.30 7. Using molecular markers to improve the accuracy of pancreatic screening
Michael Goggins, Baltimore

10.30 - 10.50 Coffee Break

10.50 - 11.30 8. Is multiplexed serum markers screening the key for early detection of pancreatic cancer?
Anna E. Lokshin, Pittsburgh

11.30 - 12.10 9. Immune infiltrates as predictive markers in pancreatic cancer
Maria Pia Protti, Milano

12.10 - 13.00 LUNCH

Session 3: Imaging

- 13.00 - 13.40 10. Future and presence of molecular imaging
Jan Grimm, New York
- 13.40 - 14.20 11. New directions in PET imaging
Jason S Lewis, New York
- 14.20 - 15.00 12. Nature's derived nanoparticles for targeted diagnosis and therapy
William Mulder, New York
- 15.00 - 15.15 Coffee Break

-
- 15.15 - 16.00 **Discussion Forum**
All speakers and workshop participants
-

Session 4: Endoscopy

- 16.00 - 16.20 13. Biomarker discovery in mouse and human pancreatic cancer?
David Tuveson, Cambridge
- 16.20 - 16.40 14. Fluorescence imaging to detect PanIN lesions
Dieter Saur, Munich
- 16.40 - 17.00 15. Practical experience with detection of precancerous lesions in high risk
groups in a clinical setting.
Marcia Canto, Baltimore
- 17.00 Concluding Remarks, Farewells

Note: all listed speakers have confirmed their participation.
