PRESS RELEASE 4/2018

Co-operation negotiations with research institutes and organisations in Russia

IAMO delegation travels to Moscow for discussions

Halle (Saale), 11 April 2018 - Led by IAMO Director Professor Thomas Glauben, the delegation travelled to Moscow, Russian Federation, for co-operation negotiations in March 2018. There the IAMO researchers held bilateral discussions with respected research institutes and organisations regarding the opportunities for research and further development of the agricultural sector in Europe and Asia. Alongside the presentation of ongoing research projects of the institute, the participants in the co-operation discussions discussed what specific measures can be taken to improve interaction between representatives from the fields of science, politics and practice.

In the scope of the visit, which lasted several days, IAMO researchers Professor Thomas Glauben, Dr. Ihtiyor Bobojonov, Dr. Ivan Duric and Dr. Oleksandr Perekhozhuk met for in-depth discussions with representatives of renowned research institutes and organisations in Moscow, including the heads of the German Houses of Research and Innovation Moscow (DWIH), the director of the Moscow office of the Food and Agriculture Organization of the United Nations (FAO), the president of the National Union of Food Exporters, the staff members of the German Embassy in Moscow, the heads of the Russian Academy of Sciences and other acclaimed research institutes, such as the Center of Economic and Financial Research (CEFIR), the New School of Economics (NES) and the Higher School of Economics (HSE).

In a very open atmosphere the various partners discussed issues within the context of globalisation, digitalisation and geopolitical challenges concerning the possibilities for establishing more long-term oriented, sustainable co-operation formats for researching developments in the food sectors of Europe and Asia. In addition, the IAMO researchers reported on the current research projects at the institute, such as the BMEL-funded STARLAP project for the globalisation of food chains in the Russian Federation, the BMBF-funded KlimALEZ project for the establishment of agricultural insurance markets to cover climate risks in Central Asia and the BMBF-funded UaFoodTrade project regarding the integration of Ukrainian agricultural markets.

Press Release 4/2018 - Page 2

Within the highly constructive discussions the first considerations concerning the establishment of a

sustainable joint platform for regular interaction and the staging of events as well as the joint addressing of

research issues and projects were raised. In addition, intensive exchange of researchers and increased

dialogue with representatives from the fields of policy and practice are also planned. "The discussions once

again highlighted the considerable interest and high degree of openness of our partners in the Russian

Federation for sustainable co-operation," said Thomas Glauben.

About IAMO

The Leibniz Institute of Agricultural Development in Transition Economies (IAMO) analyses economic, social

and political processes of change in the agricultural and food sector, and in rural areas. The geographic

focus covers the enlarging EU, transition regions of Central, Eastern and South Eastern Europe, as well as

Central and Eastern Asia. IAMO works to enhance the understanding of institutional, structural and

technological changes. Moreover, IAMO studies the resulting impacts on the agricultural and food sector as

well as the living conditions of rural populations. The outcomes of our work are used to derive and analyze

strategies and options for enterprises, agricultural markets and politics. Since its founding in 1994, IAMO

has been part of the Leibniz Association, a German community of independent research institutes.
