OCTOBER 18, 2018

THIRD FLOW CHEMISTRY DEMONSTRATION WORKSHOP

EVENT LOCATION

Fraunhofer Institute for Microengineering
and Microsystems IMM
Carl-Zeiss-Strasse 18-20
55129 Mainz | Germany

openhouse@imm.fraunhofer.de
www.imm.fraunhofer.de/openhouse2018

Five good reasons to join:

- See live demonstrations of lab and pilot scale set-ups in the field of continuous liquid phase processing
- Find out how to speed-up process development and multi-step organic synthesis while taking care of environmental aspects
- Discover solutions for inline monitoring and process control
- Learn about future chemical production concepts based on a container-format approach
- Discuss your challenges with our experts

Continuous processes you will see in action include:

- Reactive intermediate formation and consumption
- Electrochemical organic synthesis
- Chain-growth polymerization
- Photochemical applications
- Encapsulation of active ingredients

Let us take the next steps in chemical processing together! Just send an email to register and secure your spot early in this exciting display of what continuous chemistry at Fraunhofer IMM is all about! Invitation and full program will follow in mid-2018.
