ABOUT THE CHILD HEALTH FOUNDATION

The foundation was established in 1997 with the mission to promote the health and quality of life of children and adolescents. The Foundation supports research and scientific exchange, facilitates training of health care professionals, and shares evidence based information on pertinent issues relevant to child health with the public and with decision makers. In close collaboration with competent partners and renown specialists, the Foundation develops and evaluates health promotion strategies and programs based on current scientific knowledge, for example for day care and Kindergarten settings and for schools. In 2019, the charitable Foundation raised about 1 million Euro in funds and employed 15 people (www.kindergesundheit.de).
