

WOMEN IN PHOTONICS

OCTOBER 28 – 30, 2020 // VIRTUAL WORKSHOP

powered by **biophotonics4FUTURE**

CAREER OPPORTUNITIES IN PHOTONICS

The virtual workshop “Women in Photonics” aims at connecting excellent female scientists at the beginning of their career with experts in photonics holding leading positions at research institutions and companies.

The focus of this year's workshop will be on:

- **Biophotonics** such as vibrational spectroscopy, fluorescence, OCT, PAT, etc.
- **Photonic data science**, machine learning, artificial intelligence

The workshop addresses young female post-docs working in these research areas, who want to present their own work and build up new networks. Participants will have the opportunity to exchange with experienced scientists from academia and industry and jointly develop strategies for a successful professional career.

Participation is free of charge.

WORKSHOP TOPICS

Career Opportunities in Photonics Industry

Hightech companies introduce themselves

Virtual Poster Session

Networking & discussion opportunities

Scientific Talks

Present your own research

Career Reports from Academia

En route to professorship

Introduction

Photonics in Thuringia // Science & Technology at Leibniz IPHT
