PHOTONICS DAYS Berlin Brandenburg

innovationconference

After the successful virtual Photonics Days Berlin Brandenburg 2020 with over 900 registered participants and numerous parallel sessions, we are pleased to be able to hold the conference in hybrid format this year.

We cordially invite you to 4 days of professional exchange and networking online and on site in Berlin-Adlershof. You can expect numerous parallel sessions on the exciting topics from the following areas:

Photonics for forestry and the wood industry | BioSensing with photonic integrated circuits | Quantum Technologies | PhotonHUB Europe | Photonic terahertz technology for beyond 5G wireless communication | Data center interconnects | German-Israeli nano photonics session in cooperation with NanoIL | Hyperspectral imaging | Optics for solar energy | PolyPhotonics Berlin | Laser Technology | Photonics for AgriFood applications | Sensor AI - a key for a new generation of sensor systems | Advanced UV technologies and applications | Microelectronics & Si-Photonics | Photonic integration as quantum enabling technology | Advances in optical metrology | Vision systems & IR detection for industry, security & defence | Photonics in Japan | Photonics in China | Recruiting-Event "Working in Photonics"

[MORE INFORMATION ABOUT THE CONFERENCE \(LINK\)](#)

In addition to the conference, there will be an accompanying exhibition on October 6th and 7th. Members of OpTecBB, OptecNet Germany and partner networks have special conditions. The number of stands has been reduced due to the Corona requirements.

AGENDA

Monday 04.10.2021

- 12:30 – 14:30 Virtual matchmaking event: meet the right people for your project, product or other endeavor
- 15:00 – 18:00 Photonics for forestry and the wood industry | Recruitment-event: Working in photonics in Berlin

Tuesday 05.10.2021

- 10:00 – 12:00 Photonics in Hamamatsu and in Japan | PhotonHUB Europe | Building a strong Quantum Industry | BioSensing with photonic integrated circuits | Photonic terahertz technology for beyond 5G wireless communication
- 12:30 – 14:30 Virtual matchmaking event: meet the right people for your project, product or other endeavor
- 15:00 – 18:00 Optics for solar energy | PolyPhotonics Berlin, innovating hybrid photonic integration platforms for sensing | Hyperspectral imaging | German-Israeli nano photonics (NanoIL & OpTecBB) | Data center interconnects

Wednesday 06.10.2021

- 10:00 – 12:00 Optics for solar energy | Berlin Quantum Technology Symposium | Photonics for AgriFood applications | Laser Technology - new trends
- 12:30 – 14:30 Virtual & On-site matchmaking event: meet the right people for your project, product or other endeavor
- 15:00 – 18:00 Photonics for AgriFood applications | Sensor AI - a key for a new generation of sensor systems Berlin Quantum Technology Symposium (incl. Start-ups) | Optics for solar energy
- 18:00 – 20:00 Evening-reception: Networking @ Bunsen-Hall

Thursday 07.10.2021

- 10:00 – 12:00 Photonic integration as quantum enabling technology | Photonics in China | Microelectronics & Si-Photonics | Advanced UV technologies & applications | Advances in graphene technologies & applications
- 12:30 – 14:30 Virtual & on-site matchmaking event: meet the right people for your project, product or other endeavor
- 15:00 – 18:00 Vision systems & IR detection for industry, security & defence | Advances in optical metrology Microelectronics & Si-Photonics

PHOTONICS DAYS BERLIN BRANDENBURG 2021
