DigiHealthDay-2021 is open for registration

Following the success of the first DigiHealthDay (DHD) at the European Campus Rottal-Inn (ECRI) last year, the Campus is now continuing the international symposium as an annual event. The DHD-2021 will take place virtually on November 12. A series of pre-event workshops will be held in the run-up to the DHD-2021. The first workshop will take place next week, on April 26. Registration for the workshops and the event is now open.

The DHD-2021 offers a comprehensive programme on modern Digital Health and its role in tackling global health problems from a uniquely international perspective, with a special focus on Digital Health Education. It will include Keynote Talks by top German and international experts, an extremely interesting Panel Discussion on the “Future of Digital Health Data”, as well as oral and poster scientific presentations, student thesis and project presentations, and (virtual) networking possibilities.

The DHD-2021 is preceded by a series of virtual workshops, which will take place in spring and summer. The extensive programme with a total of eight workshops has something in store for everyone interested in Digital Health and related issues. Topics range from Data Integration and Interoperability, Human-Computer Interaction in Digital Health, Digitalisation of Healthcare in Germany and in the US to Digital Imaging and Artificial Intelligence in Radiology, to name but a few.

Everyone with an interest in Digital Health such as researchers, healthcare professionals, businesses and start-ups, authorities or students is invited to participate in ECRI’s DigiHealthDay-2021. For further information about the event and workshops, please visit the homepage www.th-deg.de/digihealthday.

The first DHD last autumn was attended by 348 participants from 59 countries. Due to the great success, the event will be held annually from now on. The event series is organised and conducted by Prof. Dr. Georgi Chaltikyan.
Prof. Dr. Georgi Chaltikyan, initiator of the DigiHealthDay, is a renowned expert in the field and an esteemed keynote speaker worldwide.
