TU9 Informs Junior Researchers in the USA about Career Paths at Technical Universities in Germany

TU9, the Alliance of leading Technical Universities in Germany, will be present at the annual conference and Talent Fair of the German Academic International Network (GAIN) in Boston from August 25 to 27, 2023. In workshops, discussion panels, and at the Talent Fair, representatives will provide advice on funding opportunities and career paths at TU9 Universities.

TU9 University managers and experts from career support formats will be available in various formats to answer questions about returning to Germany, different career paths at and with universities, the possibilities of interdisciplinary research and cooperation, and the importance of good management and leadership.

The TU9 Alliance is offering its own workshop on the topic of "Innovation & Transfer - Careers between Science, Business and Start-ups". Professor Angela Ittel, TU9 President and President of TU Braunschweig, Professor Ursula Staudinger, President of TU Dresden, and KIT alumnus Dr. Christian Reimer, Co-Founder and Head of Product of HyperLight, will be available to answer all questions about career paths and opportunities between science and business. They will present creative career opportunities and show new paths that are open to returnees in addition to the established career paths in science.

An overview of the events in which TU9 representatives are participating can be found here:
<https://www.tug.de/en/activities/tug-at-gain23/>. The entire GAIN23 program is available here:

About TU9

TU9 is the Alliance of leading Universities of Technology in Germany: RWTH Aachen University, Technische Universität Berlin, Technische Universität Braunschweig, Technical University of Darmstadt, Technische Universität Dresden, Leibniz University Hannover, Karlsruhe Institute of Technology, Technical University of Munich, and University of Stuttgart.

Tradition, excellence, and innovation are the hallmarks of TU9 Universities. Founded during the Industrial Age, they contributed decisively to technological progress back then and continue to do so today. They enjoy an outstanding reputation around the world as renowned research and teaching institutions that promote the transfer of knowledge and technology between universities and practice. As such, they train exceptional young academics for careers in science, business, and administration and assume social responsibility. TU9 Universities foster top-class international networks and diverse cooperation with industry, making them a key element of Germany's position as a location of science and innovation.
