2. PhD workshop on adaptation research in social science

(Sozialwissenschaftliche
Klimaanpassungsforschung)

Adaptation to climate change: Where and how? Dealing with existing structures and new challenges

29th November 2011, 09:00 - 17:00 pm
Dresden, Germany

Adaptation to climate change presents challenges for established systems and structures. How can climate change and the adaptation to its consequences be understood within these structures? Can they be understood as one part of general and permanent transformation processes (e. g. social, environmental and economic changes) or as a caesura, that leads to fundamental alteration? Furthermore, how can appropriate strategies be developed? Do we need entirely new arrangements or is it sufficient to adapt and develop existing structures and instruments further? Which option could be easier to achieve? Which option seems to be more likely to be successful?

Following the first PhD workshop on adaptation research in social science held in Bonn, September 2010, the Leibniz Institute of Ecological Urban and Regional Development in cooperation with the Chair of Spatial Development at the Dresden University of Technology will be hosting the next PhD workshop.

The PhD workshop will provide doctoral students working in the field of climate change in social sciences (including spatial science and economics) the opportunity to share and discuss research experiences (e.g. project ideas , theoretical and methodical approaches) and gain feedback from other doctoral students as well as experienced researchers.

Those wishing to present a poster or give a presentation at the focus groups should send an e-mail containing a short abstract by **November 15th**.

Please also register by November 15th 2011 via e-mail (j.bohnfeld@ioer.de) including the topic of your PhD-project and which focus group you would like to attend.

The registration fee is 15 Euros (including lunch and beverages). The fee can be paid at the registration desk.

Program

- 8:30 **Registration**
- 9:00 **Welcome and introduction** (Dr. Gerd Lintz, IOER)
- 9:15 **Presentations**
Organizational adaptation to disruptions in the natural environment
Dr. Timo Busch, ETH Zurich
Same same but different! – Challenges of integrating climate change adaptation into spatial and urban planning processes
Dr. Sven Rannow, IOER Dresden
- 10:45 Coffee break
- 11:15 **Discussion topic: Managing a PhD-project**
- 12:00 Lunch
- 13:00 **Poster presentations**
- 14:00 **Introduction and working in focus groups** (including individual coffee break)
Focus group 1: Urban and regional planning
Focus group 2: Governance
Focus group 3: Business/Economy
- 16:30 **Summary and final discussion**
- 17:00 End of the Workshop
- 19:00 Get together at the IOER and Dresdner Christmas market
