The above depicted image shows the outline of the conference. For each of the five topics we would like to have a number of speakers from different disciplines and backgrounds to contribute to the interactive workshops. We would like you to interpret the suggested topics as broadly as possible, and also welcome a topic recommendation if proposed presentation doesn't fit in the main topics. Please make sure that the link to model-based working is clear. For more information please visit our website: www.htwg-konstanz.de/5d

LAKE CONSTANCE
5D-CONFERENCE 2013
CONSTANCE, OCTOBER 28th - 29th

**LAKE CONSTANCE
5D-CONFERENCE 2013**
CONSTANCE, OCTOBER 28th - 29th

Join us to create an awe-inspiring and impactful second international 5D-conference in Constance Germany!

The central theme of this year's conference will be "Implementing 5D in the construction industry". We are looking for interesting projects, ambitious yet pragmatic research endeavours and revolutionary educational approaches. We aspire to offer the audience a broad spectrum of informative sessions. To avoid superficiality or thematic overlapping, six challenging sub-topics have been chosen. These will be analysed in-depth during break-out sessions and workshops.

The results will be made available in the Lake Constance 5D-Conference transcript published by the publishing company of the VDI, the association of german engineers.

If you see the charm in our ambitious approach, want to participate and have an interesting contribution, we kindly invite you to take this opportunity.

Prof. Dr. Uwe Rickers
Hochschule Konstanz
Professor for construction management

Konstantinos Kessoudis
5D-initiative
Chairman
