

Helmholtz Zentrum München and *Nature Medicine* present:

1st Annual Helmholtz-Nature Medicine Diabetes Conference

This inaugural high-impact conference brings together top leaders in the field of diabetes to facilitate the identification of, and potential solutions to, the preeminent scientific challenges facing the prevention and treatment of type 2 diabetes. The conference will feature two award presentations: the Helmholtz Diabetes Lecture, in recognition of the lifetime achievements of a senior leader in the field, and the Helmholtz Diabetes Young Investigator Award, in recognition of a rising star. Additional unique social opportunities to interact with thought leaders and colleagues will include an opening party at the Residenz, the former royal palace of the Bavarian monarchs and an art tour.

September 22-24, 2013

Residenz München, Munich, Germany
