Program

14:00 Uhr	Reception
15:00 Uhr	Welcome and Highlights of 100 Days of Health Care Innovation
15:30 Uhr	Keynote Meng Weng Wong (JFDI Asia)
15:45 Uhr	Coffee Break
16:00 Uhr	Startup Presentations
17:30 Uhr	Meet The Founders
19:00 Uhr	Celebration Dinner

**Between July 4 and October 12,
35 founders from all over the world
teamed up with medical doctors, scientists
and engineers from the university hospital
of Tübingen to build 10 startups in
100 days to solve pressing clinical needs.**

Monday, Oct 12th, 2015
Die Kelter, Tübingen

Background Information

Recently healthcare is undergoing massive changes. Digitalization, miniaturization and mobilization are only some of the forces which increasingly shape the every day activities of medical doctors and influence the treatment of patients. Products and processes with a medically relevant function become smaller, more mobile and digitally interconnected with other devices. These disruptive innovations are in the focus of the Demo Day.

The ten needs- and team-driven MedTech projects were incubated in 2015 at the Medical Innovations Incubator GmbH and trained in the MedTech Startup School at the University of Tübingen. The technologies are e.g. smartphone apps, wearable monitoring systems, non-invasive biosignal measuring products, and hometherapy systems. We invite you to join our Demo Day – here you will see how the future of healthcare will look like. Be part of it!

Why attend the Demo Day?

Each of the interdisciplinary teams has undergone the 100 days innovation training.
The teams were supported by lawyers, scientists, business experts, mentors and medical doctors. With outstanding motivation and with professional guidance they created novel products and business ideas. Investors, academics, business experts and healthcare professionals will get into contact thinking about future perspectives.
