

BIH Symposium 2016

Exploring Systems Medicine

28–29 January

Submit
your
abstract!

VENUE: Max Delbrück Center for Molecular Medicine in the Helmholtz Association | Campus Berlin-Buch

CONFIRMED SPEAKERS:

Erwin Böttinger (BIH), **Guoping Feng** (MIT, USA), **Jürgen Knoblich** (IMBA, Austria),
Vasan Ramachandran (Boston University, USA), **Viola Vogel** (ETH Zürich)

**BERLIN
INSTITUTE
OF HEALTH**

Charité & Max Delbrück Center

Systems medicine has the potential to transform science and health care by accelerating discoveries and their application. Through integrating different disciplines and holistic approaches, systems medicine will provide insight into biological concepts and complex nature of diseases in ways never possible before.

The first BIH Symposium taking place early in 2016 will develop scientific exchange on current concepts, approaches and challenges in systems medicine and translation.

The symposium seeks to join BIH-interested scientists and clinicians to stimulate communication and explore new avenues of collaboration.

Shape the future of systems medicine in Berlin and beyond, participate and submit your abstract now!

Submit your abstract by 20 November 2015 if you are a scientist or clinician at any career stage working on innovative projects with potential relevance for translation and systems medicine.

Abstract submission is open to all research fields. The scientific organizing committee will review all abstracts and provide opportunities for oral presentations for the most exciting contributions.

Scientific Organization: Walter Birchmeier, Holger Gerhardt, Francesca Spagnoli, Baris Tursun (MDC); Georg Duda, Angelika Eggert, Burkert Pieske, Clemens Schmitt (Charité)
