

**Symposium**  
***“Biomedicines at the heart of translational research and regulation”***  
***Paul-Ehrlich-Institut, Langen (Germany), Friday, 26 February 2016***

**Programme**

- 12:00 – 12:10**    **Welcome and introduction**  
Stefan Vieths, Paul-Ehrlich-Institut, Langen
- 12:10 – 12:35**    **HIV Discovery: How light came out a lymph node**  
David Klatzmann, Sorbonne University, Paris
- 12:40 – 13:05**    **Challenges and opportunities in HIV research**  
Hans-Georg Kräusslich, Ruprecht-Karls-Universität, Heidelberg
- 13:10 – 13:35**    **Gene therapy: From innate and adapted to designed immunity**  
Christopher Baum, Medizinische Hochschule Hannover
- 13:40 – 14:25**    **Snack/Coffee break**
- 14:30 – 14:55**    **Synthetic DNA Vaccines for Difficult Immune Targets**  
David Weiner, University of Pennsylvania, Philadelphia
- 15:00 – 15:25**    **Cancer research from the bench to the bedside**  
Otmar D. Wiestler, Helmholtz-Gemeinschaft, Berlin
- 15:30 – 15:55**    **Regulatory challenges**  
Guido Rasi, European Medicines Agency, London
- 16:00 – 16:25**    **Pharma legislation**  
Andrzej Rys, European Commission, Brussels
- 16:30 – 16:55**    **Coffee break**
- 17:00 – 17:25**    **Regulatory Challenges for Biological Products**  
Karen Midthun, Food and Drug Administration, Rockville Maryland
- 17:30 – 17:55**    **Science and Society – Infectious Diseases as an Example**  
Jörg Hacker, Deutsche Akademie der Naturforscher Leopoldina, Halle (Saale)
- 18:00 – 18:25**    **R&D for potential vaccines in an emergency: lessons from the Ebola outbreak**  
Marie-Paule Kieny, World Health Organization, Geneva
- 18:30 – 18:40**    **Concluding remarks**  
Klaus Cichutek, Paul-Ehrlich-Institut, Langen
