7th INTERNATIONAL NEPS CONFERENCE

December 5-6, 2022 | LIfBi Bamberg | online

INVITATION

The Leibniz Institute for Educational Trajectories (LIfBi, Bamberg) cordially invites to the 7th International NEPS Conference. By tradition, this conference brings together scientists from different disciplines and from different stages of their academic career to present ongoing projects and discuss current findings in educational research. The framework is set up by the National Educational Panel Study (NEPS) with its panel cohorts covering the entire life span and focusing on competence development, educational processes in several learning environments, educational decisions and social inequality, acquisition of education against the background of migration, returns to education, as well as motivational and personality-related aspects → www.neps-data.de.

The conference program includes 18 paper sessions with more than 50 presentations, a keynote lecture by Prof. Regina T. Riphahn, PhD (Friedrich-Alexander-University Erlangen-Nuremberg) on the topic "Subsidized small jobs and maternal labor market outcomes in the long run", an award ceremony for the best NEPS publication, and a poster session in a rather informal atmosphere. The event will be supplemented by joint virtual lunch breaks and a casual get-together with the opportunity to exchange ideas with the RDC team at the end of the conference → www.neps-data.de/neps-conference2022/Conference-Schedule.

Venue: The conference is held virtually via Zoom.

Language: Conference language is English.

Participation: All interested persons are welcome to attend the conference, regardless of presenting an own contribution or passive participation. There is no conference fee to pay. The only requirement is a registration.

Registration: The online form for registration is available on our website
