

Greenhouse Gas-Neutral Enterprises and Administrations - between Greenwashing and Green Transition

24th and 25th of January 2023 | organized by Fraunhofer ISE

At a glance

- A conference hosted by the Fraunhofer ISE on behalf of the Umweltbundesamt (UBA)
- Overview on greenhouse gas neutrality from the scientific, practical, and political perspective
- Insights from a variety of different stakeholders
- Connect to other stakeholders within this fast-developing domain, exchange knowledge and get to know the best practices in the field
- Enable Enterprises and Administrations to truly transition to greenhouse gas neutrality

Please find the agenda on the second page.

On behalf of the German Environment Agency (UBA), the Fraunhofer Institute for Solar Energy Systems ISE organizes a conference at the Fraunhofer ENIQ in Berlin in January 2023. The conference aims at shedding light on the topic of greenhouse gas GHG-neutral enterprises and administrations and helps participants to distinguish between greenwashing and a sustainable green transition.

The first day of the conference starts with keynotes and speeches presenting the latest insights on the different concepts and perspectives of GHG-neutrality from science, climate policy and practice. The insights will be expanded in different parallel workshop sessions with deep dives into topics such as GHG-neutral buildings or procurement. The second day focuses on controlling and offsetting GHG emissions and how to detect and avoid the suspicion of greenwashing.

The event enables an interactive transfer of expertise by several parallel and open space sessions, high-level keynotes, panel discussions and networking with other stakeholders. It aims at mapping the dynamic field of GHG-neutrality and supports the sustainable transformation of organizations and enterprises. The conference is free of charge and will be held in English.

Live Session

When?

24th and 25th of January
9:30 - 17:00 at Day 1
9:00 - 13:00 at Day 2

Where?

Fraunhofer ENIQ
EUREF-Campus 23/24
10829 Berlin

Registration

<https://s.fhg.de/greenhousegasneutral>

organized by Fraunhofer Institute
for Solar Energy Systems ISE and
German Environment Agency (UBA)

24th of January – Introduction to concepts from science, policy and business perspective

09:30

Arrival and get together

10:00

Welcome and introduction

Welcome

Dirk Messner, President of German Environment Agency UBA

Keynote: Greenhouse-gas neutrality from a professional, political, and practical perspective

Helena Viñes Fiestas, UN High Level Expert Group on Net-Zero

10:30

The Science Perspective

Voluntary initiatives and activities on GHG neutrality – An overview

Dirk Messner, President of German Environment Agency UBA

11:00

The Policy Perspective

Socio-ecological transition: What climate policy expects from business; How climate policy can integrate voluntary initiatives

Sven Dammann, EU DG Climate

11:30

Coffee Break

11:45

The Practical Perspective

Evolution and relevance of the concepts climate and GHG-neutrality

Christoph Kost, Fraunhofer ISE

Overview and evaluation of initiatives for climate- and greenhouse gas emission neutral organisations

Franziska Riedel, Fraunhofer ISE

13:00

Lunch Break

14:00

Parallel Workshop Session I

1. The business challenge –

How enterprises ensure sound and credible GHG neutrality claims

Carsten Warnecke, New Climate

2. The administrative challenge –

How the public sector becomes a role model for GHG neutrality? claims

Kerstin Röhling, BMWK

3. The Research Institutional challenge – How science organisations and universities become GHG-neutral?

Melanie Sporer, European Environment Agency

15:15

Coffee Break

15:30

Parallel Workshop Session II

1. The building and housing

challenge – How to construct and operate GHG-neutral buildings?

Christian Stolte, dena

2. The mobility challenge –

How to organize a GHG-neutral transport?

John Anderson, DLR

3. The procurement challenge –

How to manage a GHG-neutral supply chain?

N.N.

16:45

Outcome of Workshop Sessions I and II

Christoph Kost, Fraunhofer ISE

17:00

End of Day 1

19:30

Informal dinner (at own expense)

25th of January – Implementation measures, compensation, how to avoid greenwashing

09:00

Welcome

09:15

Parallel Workshop Session III

1. The accounting and controlling challenge – How to quantify and control GHG emissions and reductions?

Maximilian Seier, EnBW

2. The compensation challenge – How does offsetting contribute to climate mitigation?

Denis Uieß, ClimatePartner

3. The communication challenge – How to ensure credible and transparent climate reporting?

Hanna Schreiber, Umweltbundesamt GmbH Austria, David Lammers, CDP

10:30

Outcomes Parallel Workshop Session III and transfer to Openspace/Poster-Session

Christoph Kost, Fraunhofer ISE

10:45

Openspace/ Networking/ Coffee Break

Outcomes from the Parallel Workshop Session + Networking

11:30

Outcomes of Parallel Workshop Session I – III

Gathering in plenum for Panel Discussion

Christoph Kost / Franziska Riedel, Fraunhofer ISE

11:45

Panel Discussion: Between Greenwashing and Green Transition

■ *Helena Viñes Fiestas, UN High Level Expert Group on Net-Zero*

■ *Silke Mooldijk, New Climate*

■ *Johanna Pütz, BCG*

■ *Lili Fuhr, CIEL*

12:45

Conclusions and Findings

13:00

End of Conference
