New EMBO Fellowships for Core Facility staff

Heidelberg 25 February 2020 – EMBO announces an extension of its current Short-Term Fellowship scheme: Core Facility Fellowships. These fellowships will support exchanges of technology and expertise between core research facilities that provide services to research institutions or universities.

The fellowships, which are funded by the European Molecular Biology Conference (EMBC), will support these exchanges through financial contributions towards travel and subsistence costs for facility staff to visit other research facilities. The aim of the exchanges is for scientists or technicians working in a core facility to learn specific techniques or acquire expertise which they can then implement at their home institutes when they return.

The programme fosters international exchange, so the home and host institutes must be in different countries. Both institutes must be located in an EMBC Member State, EMBC Associate Member State or Cooperation Partner. A list of eligible countries can be found here. The exchange visit can last for a period of one week to one month.

Applications for Core Facility Fellowships are now open. Further information about the eligibility criteria, benefits of the programme and the application process can be found on the EMBO website at: https://www.embo.org/news/press-releases/2020/new-embo-fellowships-for-core-facility-staff

About EMBO

EMBO is an organization of more than 1800 leading researchers that promotes excellence in the life sciences in Europe and beyond. The major goals of the organization are to support talented researchers at all stages of their careers, stimulate the exchange of scientific information, and help build a research environment where scientists can achieve their best work.

EMBO helps young scientists to advance their research, promote their international reputations and ensure their mobility. Courses, workshops, conferences and scientific journals disseminate the latest research and offer training in techniques to maintain high standards of excellence in research practice. EMBO helps to shape science and research policy by seeking input and feedback from our community and by following closely the trends in science in Europe. For more information: www.embo.org
